

BARRACUDA

1994

A2X – Extreme Excitement

A2T – everything but Tame

WHERE 'CUDAS COME FROM

To build a great bike, start with a **great frameset**. Every Barracuda – from the upstart A2B to the extreme A2X – is built of the same proprietary DiHedral® tubing. Strong, durable, and lightweight. Joints are meticulously mitered to perfection and flawlessly tig-welded. That's the beauty of the beast.

After a three-stage paint process, including primer, paint, and a durable clearcoat finish, the frame is pronounced a 'Cuda. The **LIFETIME WARRANTY** kicks in. And just to be sure your 'Cuda is a

perfect fit, we pay for a tune-up 30 days after you buy it. Because only the best will do. For you. For us.

GET TO THE SEAT OF THE PROBLEM Choose from three saddles for a custom-fit: the 'Cuda 200ti, 'Cuda CR225, and the Terry saddle, each designed specifically for your riding needs.

PEDAL TO THE METAL Finetune the sizing of your Barracuda with a crankarm length that fits your body and your bike. **THAT'S ABOUT**

THE SIZE OF IT Barracuda's proportional sizing recognizes that riders come in all sizes. So do our bikes – from 12 to 19 inches.

Comp – inCOMParable,
unCOMPromising

A2V – Voracious, for the thrill hungry

A2R – rugged Renegade of the offroad

A2B – to Be or not to be? A2B
